SUMMARY

Enterprise IT professional with four years of experience administering SCCM/Intune across a 30,000+ device, 30,000+ user environment, currently completing a BSc (Honours) in Data Science & Artificial Intelligence at IIT Guwahati. Applying production systems experience — automation, infrastructure ownership, and reliability at scale — to a transition into AI/ML Engineering, backed by hands-on machine learning projects.

PROFESSIONAL EXPERIENCE

SCCM & Intune Administrator — HCLTech, Lucknow (Scholar → Intern → Analyst) September 2022 – Present

- Administer SCCM/MECM and Microsoft Intune across 30,000+ devices (Windows 10/11 workstations, Windows Servers, Android, Apple) and 30,000+ users.
- Led end-to-end migration of BitLocker management from MBAM to SCCM, configuring policy enforcement and Self-Service/Administrator recovery portals with zero disruption to encryption compliance
- Performed a full SCCM platform upgrade — prerequisite assessment, execution, post-upgrade validation
- Diagnosed and resolved issues related to patching, Application deployment, patch sync, etc.
- Built PowerShell automation for patch issue detection/remediation and self-healing (detection/reinstallation) of broken SCCM clients, reducing manual remediation effort
- Led critical server patching and an organization-wide Windows 11 rollout with no major incidents; configured and deployed Microsoft Defender onboarding and antimalware policy fleet-wide
- Developed SQL queries for SCCM reporting, and managed application and configuration baselines creation/deployment.

PROJECTS

Shravan — Real-Time Assistive Object Detection & Voice Guidance github.com/Ujjwals-GHub/Shravan_AI

- Custom-trained a YOLO11n model (Ultralytics houseobject4k base + custom-annotated dataset) achieving 74.97% precision, 66.73% recall, 72.71% mAP@0.5
- Engineered an asynchronous Windows SAPI text-to-speech pipeline using threaded COM handling to prevent video feed interruption during voice guidance

Python, OpenCV, Ultralytics YOLO | Live demo: [shravan-ai.streamlit.app](#)

Anime Recommendation System — Content-Based Filtering Engine github.com/Ujjwals-GHub/Anime_Recommendation_System

- Built a TF-IDF + cosine similarity recommender over 39,380 titles from the Manami Project's Anime Offline Database
- Resolved a 12.4GB out-of-memory crash by redesigning similarity computation from a precomputed matrix to on-the-fly sparse calculation
- Solved Streamlit UI freezing caused by 100,000+ non-ASCII title strings via a custom alias-filtering layer

Python, Scikit-learn, Pandas, Streamlit | Live demo: [ujjwals-animerecommendationsystem.streamlit.app](#)

Wednesday (In Progress) — Personal desktop AI assistant executing text-command app/window management and to-do tracking; speech-to-text integration in progress.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy
Machine Learning: Scikit-learn, TensorFlow, PyTorch
Data Visualization: Power BI, Matplotlib
Enterprise IT: SCCM/MECM, Microsoft Intune, WSUS, PowerShell, Active Directory/Entra ID, ServiceNow
Development Tools: Git, GitHub, Streamlit
Currently Learning (theoretical): Generative AI, LLMs, RAG, Prompt Engineering

EDUCATION

BSc (Honours), Data Science & Artificial Intelligence — IIT Guwahati Expected January 2028
CPI: 8.09/10 (through Semester 8)
Class XII, M.B DAV Public School — 81.2% 2022
Class X, M.B DAV Public School — 88% 2020

CERTIFICATIONS

MD-102 Endpoint Administrator | AI-900 Azure AI Fundamentals | AZ-900 Azure Fundamentals | MS-900 M365 Fundamentals
